

Company Overview

AERIS – ONE IOT PLATFORM. ENDLESS POSSIBILITIES.

Aeris IoT and M2M solutions are built for connected devices. We are experts on the specific technology and service needs of machine-to-machine communications and the companies that deploy these programs.

As veterans of the IoT and M2M industry, we know that developing and deploying an IoT solution is complex, and we pride ourselves on simplifying the process for you. Our IoT platforms and connectivity solutions help to fundamentally improve your business by reducing costs, improving operational efficiency, reducing time to-market, and enabling new revenue streams.

WHY AERIS?

Complete IoT Platform — We provide a complete technology stack from a connectivity management portal to an application enablement platform to integrated analytics. You can choose which ones best meet the needs of your IoT program.

Easy Integration — Aeris provides companies an unparalleled ability to integrate their own operations with our APIs, data feeds, and online access.

Lowest TCO — Our customers enjoy the lowest Total Cost of Ownership (TCO) for IoT and M2M deployments.

Technology and Operator Agnostic — We offer cellular technologies including GSM and CDMA for 2G, 3G, and 4G/LTE, or you can use the network technology or operator of your choice.

Robust Security — The Aeris network is designed such that all network elements, are protected from access outside Aeris to the maximum extent possible.

Industry's Best Service — No matter the deployment size, Aeris guarantees the fastest troubleshooting response times and the most comprehensive consultation program.

AERIS COMPLETE SOLUTIONS

Aeris provides everything you need to implement, manage, troubleshoot, and scale your IoT and M2M program. Our IoT platform is optimized for the unique requirements of devices for global connectivity, device management, billing, analytics, and more. Each part works together seamlessly, and you can select specific modules to customize a solution to fit your needs.

AERCORE™ – IOT / M2M CORE NETWORK

Our network infrastructure manages more than eight billion events per day. We connect your devices to the strongest cellular signal in over 180 countries.

AERPORT™ – CONNECTIVITY MANAGEMENT PLATFORM

AerPort™ gives you unprecedented visibility into your network and devices. This platform provides extensive alerts and near real-time access to reports, purchasing information, specifications, device management, billing details, and customer support.

AERCLOUD™ – APPLICATION ENABLEMENT PLATFORM

This next-generation platform makes it simple for application developers to collect and store IoT / M2M data, mine the data for critical business insights, and securely publish that data to applications and third parties using standard industry protocols.

AERVOYANCE™ – DEVICE, USAGE, PERFORMANCE, AND COSTS ANALYTICS

AerVoyance™ provides visibility, insight, alerts, and actionable information about your device's usage, performance, and costs.

AERB/OSS™ – BILLING AND RATING ENGINE

AerB/OSS™ meets the needs of complex IoT and M2M deployments with infinite flexibility in rate plans and device lifecycle billing management.

AERIS GSP™ – MANAGED SERVICES PLATFORM FOR MOBILE NETWORK OPERATORS

Aeris GSP™ enables other cellular operators to broaden their serviceable market, improve service margins, and position themselves to serve the Internet of Things. Our GSP customers gain rate plan flexibility and the lowest cost of service delivery for profitability in the challenging IoT and M2M market.

NEO™ – SELF-SERVE IOT POWERED BY AERIS

This online marketplace enables any company to easily develop, launch, and manage innovative IoT solutions that require cellular connectivity, while dramatically reducing the time, cost, and hassle of obtaining connectivity from traditional cellular operators.

ABOUT AERIS

Aeris is a pioneer and leader in the market of the Internet of Things — as an operator of end-to-end IoT and M2M services and as a technology provider enabling other operators to build profitable IoT businesses. Among our customers are the most demanding users of IoT services today, including Hyundai, Acura, Rand McNally, Leica, and Sprint. Through our technology platform and dedicated IoT and M2M services, we strive to fundamentally improve their businesses — by dramatically reducing costs, improving operational efficiency, reducing time-to-market, and enabling new revenue streams.

Our global headquarters is in Silicon Valley (California, US). Our European headquarters is near London, UK, and our Asia Pacific headquarters is near Delhi, India. Visit www.aeris.com or follow us on Twitter [@AerisM2M](https://twitter.com/AerisM2M) to learn how we can inspire you to create new business models and to participate in the revolution of the Internet of Things.
